#### **NOTICE TO OWNERS AND OPERATORS**

BIRO's products are designed to process food products safely and efficiently. Unless the operator is properly trained and supervised, however, there is the possibility of a serious injury. It is the responsibility of the owner to assure that this machine is used properly and safely, strictly following the instructions contained in this Manual and any requirements of local law.

No one should use or service this machine without proper training and supervision. All operators should read and be thoroughly familiar with the procedures contained in this Manual. Even so, BIRO cannot anticipate every circumstance or environment in which its products will be used. You, the owner and operator, must remain alert to the hazards posed by the function of this equipment — particularly the SHARP ROTATING BLADES. No one under eighteen (18) years of age should operate this equipment. If you are uncertain about a particular task, ask your supervisor.

This Manual contains a number of safe practices in the SAFETY TIPS section. Additional warnings are placed throughout the Manual. Warnings related to your personal safety are indicated by:

OR

Warnings related to possible damage to the equipment are indicated by:

If any warning label, or Manual becomes misplaced, damaged, or illegible, please contact your nearest Distributor or BIRO directly for a replacement.

Remember, however, this Manual or the warning labels do not replace the need to be alert and to use your common sense when using this equipment.

This Manual applies to machines with serial number 30,000 and higher; to machines with redesigned SD gear box, serial number 52,902 and higher; and machines with redesigned heavy duty gear box, serial number 52,884 and higher.

#### - NOTE -

A copy of this manual is included with each PRO-9 TENDERIZER

The descriptions and illustrations contained in this manual are not binding. The manufacturer reserves the right to introduce any modification without updating the manual.

#### **SAFETY TIPS**

#### SHARP ROTATING BLADES

#### TO AVOID SERIOUS PERSONAL INJURY

- **NEVER** Touch This Machine without Training and Authorization by Your Supervisor.
- ALWAYS Read Operation and Service Manual BEFORE Operating, Cleaning, or Servicing.
- ALWAYS Keep Hands Clear of Blades and Moving Parts.
- ONLY Use a Qualified Electrician to Install According to Local Building Codes: Machine MUST Be Properly Grounded.
- ONLY Install on Level, Non-Skid Surface in Clean, Well-Lighted Work Area Away from Children and Visitors.
- DO NOT Tamper With, Bypass or Remove the Safety Cover, Interlock Switch, or Toggle Switch.
- DO NOT Operate With the Safety Cover in Raised Position or Removed. Safety Cover MUST Be Down During Operation.
- ONLY Operate Machine by Using the Machine's ON/OFF Toggle Switch. ALWAYS Turn Off Toggle Switch When Not in Use.
- DO NOT Wear Gloves While Operating.
- **ALWAYS** Turn Off and Unplug Machine From Power Source and Perform Lockout/Tagout Procedures **BEFORE** Cleaning, Servicing, or Attempting to Unjam or Unclog.
- ALWAYS Wear Wire Mesh Safety Gloves When Touching or Handling Stew Cutter Attachments.
- **NEVER** Leave Machine Unattended While Running.
- **PROMPTLY REPLACE** Any Worn or Illegible Warning Labels.
- **USE ONLY** BIRO Parts and Accessories Properly Installed.

#### I. INSTALLATION

# TO AVOID SERIOUS PERSONAL INJURY, PROPERLY INSTALL EQUIPMENT IN ADEQUATE WORK AREA

- ALWAYS Use Qualified Technician and Electrician for Installation.
- ALWAYS Install Equipment in Work Area with Adequate Light and Space.
- ONLY Operate on a Solid, Level, Non-Skid Surface.
- **NEVER** Bypass, Alter, or Modify This Equipment in Any Way From Its Original Condition.
- **NEVER** Operate With Safety Cover in raised Position or Removed.
- **NEVER** Operate Without all Warnings Attached.
- 1. Read this Manual thoroughly before installation and operation. **Do not** proceed with installation and operation if you have any questions or do not understand anything in this Manual. Contact your local Distributor, or BIRO **first.**
- 2. Install machine on a level, solid, non-skid surface in a well-lighted work area away from children and visitors.
- 3. Machine must be properly grounded. Use a qualified electrician to install according to local building codes.
- 4. Make sure ON/OFF toggle switch is in "OFF" position.
- 5. Lower Safety Cover into operating position as shown in the picture on the front of this Manual.
- 6. Uncoil electrical cord and plug into specified, grounded outlet. (Specifications for this machine are found on the plate located on the back of the case.)
- 7. With Safety Cover lowered into operating position, turn ON/OFF toggle switch to "ON" position. The blades will begin to rotate. Make sure machine operates properly and is stable and secure on operating surface.

#### KEEP HANDS CLEAR OF SHARP ROTATING BLADES.

- 8. Raise Safety Cover to check safety interlock switch machine should turn off.
- 9. Turn toggle switch to "**OFF**" position.
- 10. Check placement of all warning labels. Machine is ready for trained operators to process product.
- 11. Contact your local distributor or BIRO directly if you have any questions or problems with the installation or operation of the machine.

#### II. OPERATION

### **SHARP ROTATING BLADES**

#### TO AVOID SERIOUS PERSONAL INJURY

- ONLY Properly Trained Pesonnel Should Use This Equipment.
- ALWAYS Keep Hands Clear of Blades and Other Moving Parts.
- NEVER Operate With Safety Cover in Raised Position or Removed. Safety Cover MUST Be Down During Operation.
- DO NOT Tamper With, Bypass, or Remove Safety Cover, Interlock Switch, or Toggle Switch.
- **ALWAYS** Turn Off and Unplug Machine from Power Source and Perform Lockout/Tagout Procedures Before Cleaning, Servicing, or Attempting to Unjam or Unclog.
- **NEVER** Leave Unattended While Running.
- ALWAYS Turn Off Toggle Switch When Not in Use.
- ONLY Operate Machine By Using ON/OFF Toggle Switch.
- DO NOT Wear Gloves While Running.
- **ALWAYS** Wear Wire Mesh Safety Gloves When Touching or Handling Stew Cutter Attachments for Removal and Cleaning Purposes Only.

#### A. TO PROCESS PRODUCT

1. Have product prepared prior to using this machine by slicing to appropriate size.

**NOTE A.** The dimensions of the feed slot in the Safety Cover are the **maximum** size of product which can be processed.

**NOTE B.** Position Rear Comb T3117 into one of the rear slots which is your processing requirement - tenderizing or knitting. See illustration below.

The BIRO **Tenderizer** blades cut deep into the product to server interconnecting tissue sinew. Two passes are all that is needed with the BIRO-designed Tenderizer to create value-added product from tough, less expensive beef, and hard-to-merchandise products.

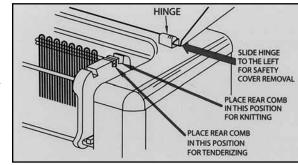

You can easily have the Tenderizer perform the **knitting** function also by changing the position of the Rear Comb (Stripper (or shown on the label)

Comb/Stripper (as shown on the label).

**Knitting** means to take two or three smaller pieces of meat and transform them into one larger, more desirable "Cube Steak." Normally, these smaller pieces of meat are processed in the meat grinder and sold as ground meat.

Since "Cube Steak" can be sold at approximately 50% more than ground meat it makes sense to use the **Knitting** 

function of the Pro-9 Tenderizer to "add value" to these lower cost products. This "secondary" function will contribute toward the payback of the unit.

#### The **Knitting** process is simple:

Place the Rear Comb/Stripper into the rear-most slot (see above label). Combine two or three smaller pieces of trimmings (or hard-to-merchandise meat) and pass them through the rollers of the PRO-9. Fold the product once after each pass and turn it 90 degrees for the next pass. After two or three passes, you have created <u>one</u> value-added product - a juicy Cube Steak!

2. Make sure Safety Cover is in the down position.

#### DO NOT WEAR GLOVES WHILE OPERATING.

- 3. Turn ON/OFF toggle switch to "ON" position.
- 4. Insert the product through the feed slot in Safety Cover. Observe the processing through the Safety Cover.
- 5. Product will exit at machine output under Blade Assemblies.

NEVER REACH OR GRAB FOR PRODUCT AT MACHINE OUTPUT - ALLOW PRODUCT TO DROP AND FULLY CLEAR ROTATING BLADES BEFORE REMOVING PRODUCT.

- 6. Repeat procedure as necessary.
- 7. TURN MACHINE "OFF" BY MOVING TOGGLE SWITCH TO "OFF" POSITION WHEN FINISHED.

#### B. TO UNJAM OR UNCLOG

# SHARP ROTATING BLADES TO AVOID SERIOUS PERSONAL INJURY

- ALWAYS Keep Hands Clear of Blades and Moving Parts.
- ALWAYS Turn Machine "OFF" and Unplug From Power Supply and Perform Lockout/Tagout Procedures BEFORE Attempting to Uniam or Unclog.
- **NEVER** Operate With Safety Cover in Raised Position or Removed. Safety Cover Must Be Down During Operation.
- ALWAYS Wear Wire Mesh Safety Gloves When Touching or Handling Stew Cutter Attachments for Removal and Cleaning Purposes Only.
- 1. If machine becomes jammed or clogged, turn ON/OFF toggle switch to "OFF" position and UNPLUG machine from power source and perform lockout/tagout procedures.

# ALWAYS WEAR WIRE MESH SAFETY GLOVES WHEN TOUCHING OR HANDLING STEW CUTTER ATTACHMENTS.

- 2. Raise Safety Cover.
- 3. Unclog or unjam machine by disassembling Blade Assemblies following directions on pages 6 and 7 of this manual.

DRIVE PINS MAY BE ENGAGED IN DRIVE COUPLING MAKING IT DIFFICULT TO REMOVE CRADLE ASSEMBLY. CAREFULLY ROTATE DRIVE BELT IN REVERSE TO DISENGAGE.

- 4. Reassemble machine according to directions on pages 9-13 of this Manual.
- 5. With Safety Cover lowered into operating position, plug machine into power source and resume normal operation.

#### III. CLEANING

#### SHARP ROTATING BLADES

#### TO AVOID SERIOUS PERSONAL INJURY

- ALWAYS Turn Off and Unplug Machine from Power Source and Perform Lockout/Tagout Procedures Before Cleaning or Servicing.
- **ALWAYS** Wear Wire Mesh Safety Gloves When Touching or Handling Stew Cutter Attachments for Removal and Cleaning Purposes Only.
- ONLY Use Recommended Cleaning Equipment, Materials, and Procedures.
- ALWAYS Thoroughly Clean Equipment at Least Daily.

#### A. CLEANING SAFETY COVER AND CASE

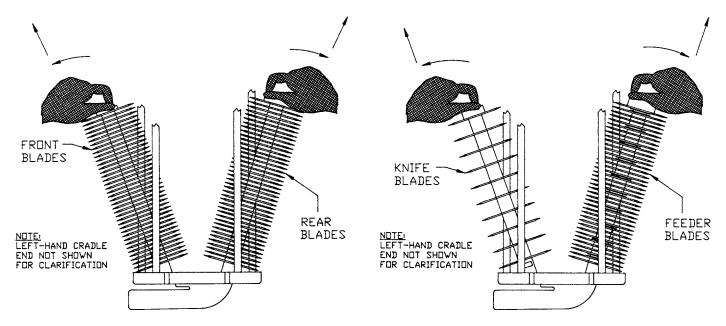

- 1. **BEFORE** cleaning, turn toggle ON/OFF switch to "**OFF**" position and **UNPLUG** machine from power supply and perform lockout/tagout procedures.
- 2. Raise Safety Cover and remove by sliding Cover to left and lifting off. Wash Safety Cover in a soapy bath of 120°-130°F and wipe with non-abrasive cloth.
- 3. Rinse thoroughly with hot water and allow to air dry.
- 4. Check to make sure all labels are intact and legible. Replace labels if they are worn or illegible.

#### B. CLEANING CRADLE AND BLADE ASSEMBLIES

# ALWAYS WEAR WIRE MESH SAFETY GLOVES WHEN TOUCHING OR HANDLING STEW CUTTER ATTACHMENTS.

- 1. Remove Cradle Assembly as follows:
  - a. While holding cradle safety lift handle with left hand, release Cradle Assembly lock on right end of Cradle Assembly with right hand and slide Cradle Assembly to right.
  - b. Bring right end of Cradle Assembly forward first, then remove Cradle Assembly from machine.
- 2. Remove front wire comb by raising it by both ends and rolling it out in a forward motion.
  - Remove rear wire comb by raising it by both ends and rolling it out in a backward motion.
- 3. Next, remove the front and rear Blade Assemblies. Holding the drive coupling end of the front blade assembly in your left hand, grasp the drive coupling end of the back blade assembly with your right hand. Pivot both blade assemblies away from each other and slide the nylon bearing out of their pilot holes as illustrated.

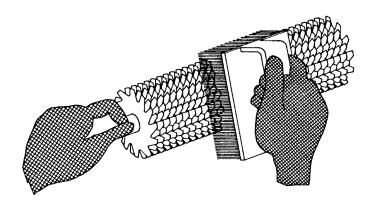

4. With the parts disassembled, they should be cleaned and sanitized as follows:

#### STEP 1

Rinse Cradle Assembly, wire combs, and Blade Assemblies in a water bath of 110°-115°F to loosen particles.

#### STEP 2

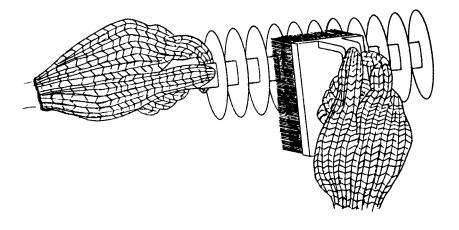

Immerse all items in soapy bath of 120°-130°F and clean using the BIRO Cleaning Brush, Part #T3091-1

CLEANING TENDERIZER, SCORING, CUTLET AND STAR BLADE ASSEMBLIES

ALWAYS WEAR WIRE MESH SAFETY GLOVES WHEN TOUCHING OR HANDLING STEW/STRIP CUTTER BLADE ASSEMBLIES.

#### **CLEANING STEW/STRIP CUTTER BLADE ASSEMBLIES**

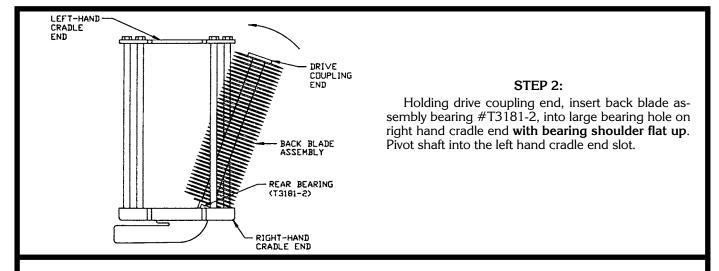

ALWAYS WEAR WIRE MESH SAFETY GLOVES WHEN TOUCHING OR HANDLING STEW/STRIP CUTTER BLADE ASSEMBLIES.

# ASSEMBLY OF PRO-9 TENDERIZER, SCORING, CUTLET AND STAR CRADLE ASSEMBLIES

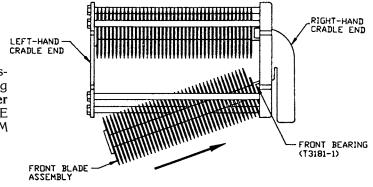

NOTE: BIRO RECOMMENDS THE USE OF WIRE SAFETY CLEANING GLOVES WHEN HANDLING CRADLE ASSEMBLIES.

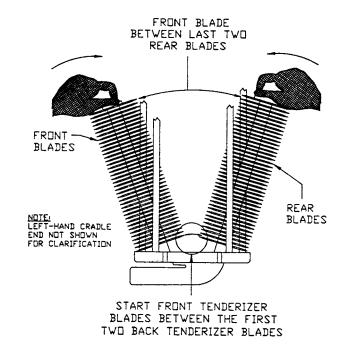

STEP 1: Place the empty cradle on table top with plastic handle toward you, left hand cradle end away.

#### STEP 3:

Holding drive coupling end, insert front blade assembly #T3181-1, bearing slightly into small bearing hole on right hand cradle end with bearing shoulder flat up. CAUTION: DO NOT FORCE OR MAKE CONTACT WITH REAR ASSEMBLY OR BOTTOM OF CRADLE BAR OR BLADES WILL BE CHIPPED.

#### STEP 4:

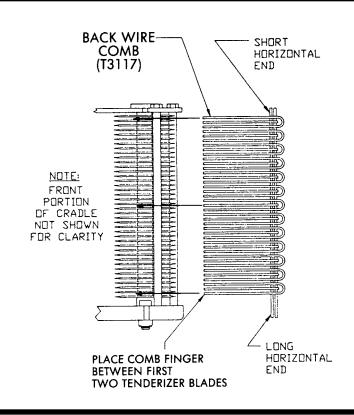

Holding the drive coupling end of the front blade assembly in your left hand, grasp the drive coupling end of the back blade assembly with your right hand and pivot the rear tenderizer blades away from the front knife blades.

#### STEP 5:

GENTLY pivot both blade assemblies together simultaneously. Make sure the front tenderizer blade at the right hand cradle end is **between** the first two rear tenderizer blades at the same end. Allow both drive coupling ends to rest in the cradle supports.

NOTE: You must take extra care in this procedure so as to match the back tenderizer blade assembly equally to the front cutting rollers in the exact way it came from the factory. If assembled properly, no binding should occur between the front and rear blade groups.

# ASSEMBLY OF PRO-9 TENDERIZER, SCORING, CUTLET AND STAR CRADLE ASSEMBLIES WITH WIRE COMBS

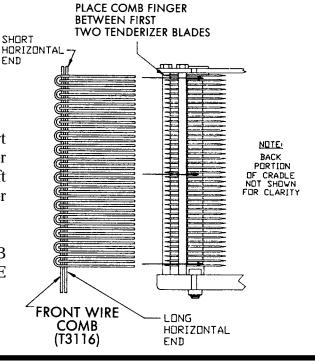

#### STEP 6:

Place back wire comb T3117 in right hand with the short horizontal end away from you. Place the comb finger closest to you (comb finger closest to right hand cradle end) **between** the first two tenderizer blades on the back blade assembly.

#### **STEP 7:**

stPlace front wire comb T3116 in left hand with short  $t \in \mathbb{R}$  horizontal end away from you. Place the comb finger gfurthest end away from you (comb finger closest to left handle cradle end) between the first two tenderizer haldes on the front blade assembly.

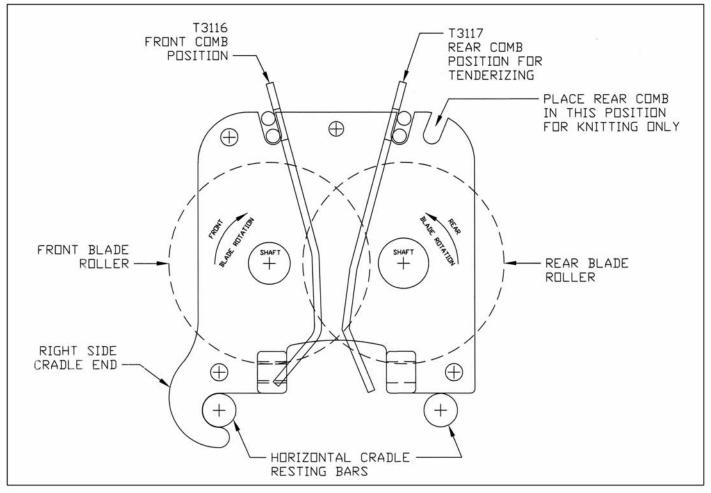

CAUTION: THERE SHOULD BE NO COMB FINGERS BETWEEN THE LEFT HAND CRADLE END AND THE KNIFE BLADE NEXT TO IT.

#### STEP 8:

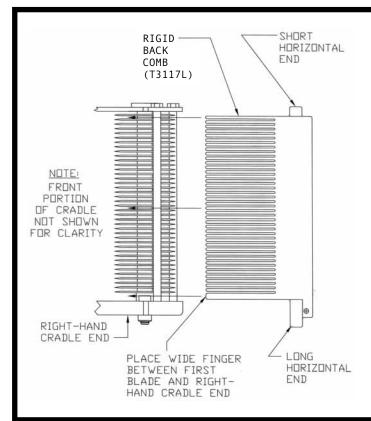

Unplug electrical cord. Holding the cutting group's support handle, begin to insert the assembled cutting group into PRO-9 Tenderizer. Open safety cover, insert coupling ends first and then rotate the right hand cradle end back counter-clockwise onto the cutting group supports. Make sure coupling ends are locked into the driving shafts and then pull down cradle lock lever to firmly secure the cutting group. Close safety cover, plug in electrical cord, turn on toggle switch, and begin operation.

# RIGHT SIDE VIEW OF CRADLE ASSEMBLY

- OPERATOR'S NOTES -

# ASSEMBLY OF PRO-9 TENDERIZER, SCORING, CUTLET AND STAR CRADLE ASSEMBLIES WITH RIGID COMBS

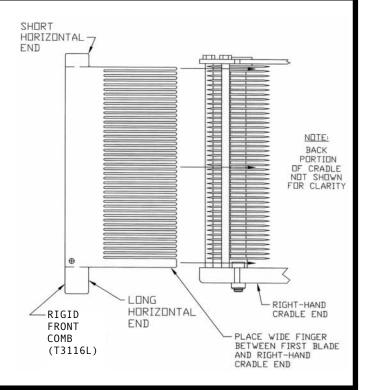

#### STEP 6:

Place back rigid comb T3117L in right hand with the short horizontal end away from you. Place the wide comb finger closest to you (wide comb finger closest to right hand cradle end) between the last tenderizer blade and right hand cradle end on the back blade assembly.

#### **STEP 7:**

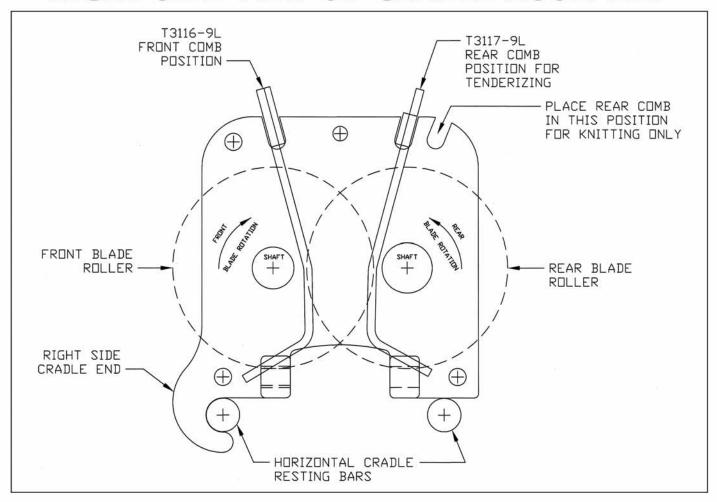

Place front rigid comb T3117L in left hand. With short horizontal end away from you. Place the wide comb finger closest to you (wide comb finger closest to right hand cradle end) between the last tenderizer blade and right hand cradle end on the front blade assembly,

#### STEP 8:

Unplug electrical cord. Holding the cutting group's support handle, begin to insert the assembled cutting group into PRO-9 Tenderizer. Open safety cover, insert coupling ends first and then rotate the right hand cradle end back counter-clockwise onto the cutting group supports. Make sure coupling ends are locked into the driving shafts and then pull down the cradle lock lever to firmly secure the cutting group. Close safety cover, plus in electrical cord, turn on toggle switch, and begin operation.

# RIGHT SIDE VIEW OF CRADLE ASSEMBLY

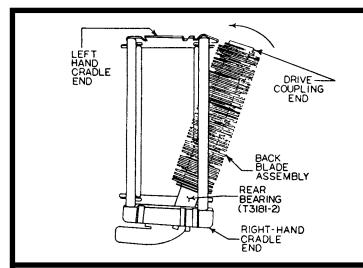

- OPERATOR'S NOTES -

# ASSEMBLY OF PRO-9 STEW/STRIP CUTTING CRADLES

NOTE: BIRO RECOMMENDS THE USE OF WIRE SAFETY CLEANING GLOVES WHEN HANDLING CRADLE ASSEMBLIES.

STEP 1: Place the empty cradle on table top with plastic handle toward you, left hand cradle end away.

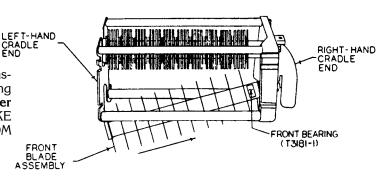

#### STEP 2:

Holding drive coupling end, insert back blade assembly T3181-2 bearing, into large bearing hole on right hand cradle end **with bearing shoulder flat up**. Pivot shaft into the left hand cradle end slot.

#### STEP 3:

Holding drive coupling end, insert front blade assembly T3181-1 bearing slightly into small bearing hole on right hand cradle end with bearing shoulder flat up. CAUTION: DO NOT FORCE OR MAKE CONTACT WITH REAR ASSEMBLY OR BOTTOM OF CRADLE BAR OR BLADES WILL BE CHIPPED.

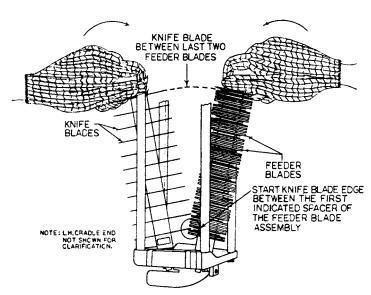

#### STEP 4:

Holding the drive coupling end of the front blade assembly in your left hand, clutch the drive coupling end of the back blade assembly with your right hand and pivot the rear feeder blades away from the front knife blades.

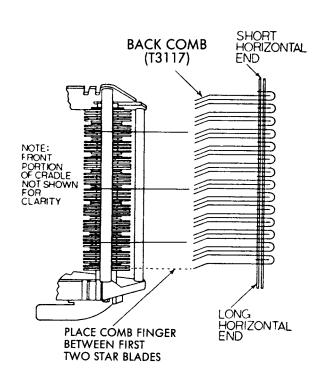

GENTLY pivot both blade assemblies together simultaneously. Make sure the knife blade at the right hand cradle end is **between** the second and third feeder blades at the same end. Note: other stew blade assemblies with different spacing start at different points. Allow both drive coupling ends to rest in the cradle supports. You must finish with the knife blade between the last two feeder blades.

NOTE: You must take extra care in this procedure so as to match the back feeder blade assembly equally to the front cutting rollers in the exact way it came from the factory. If assembled properly, no binding should occur between the front and rear blade groups.

#### ASSEMBLY OF PRO-9 STEW/STRIP CUTTING CRADLES

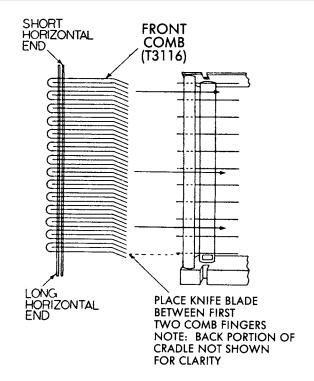

#### STEP 6:

Place back comb T3117 in right hand with the short horizontal end away from you. Place the comb finger closest to you (comb finger closest to right hand cradle end) **between** the first two feeder blades on the back blade assembly.

CAUTION: IF COMB FINĞERS ARE BENT OR DISTORTED, REBEND SUSPECT COMB FINGER BACK INTO POSITION USING THE COMB STRAIGHTENER TOOL — PART No. TA3119.

#### STEP 7:

Place front comb T3116 in left hand with short horizontal end away from you. Place the first knife blade (knife blade closest to right hand cradle end) between the second and third fingers on the front comb. CAUTION: THERE SHOULD BE NO COMB FINGERS BETWEEN THE LEFT HAND CRADLE END AND THE KNIFE BLADE NEXT TO IT. Note: this procedure varies upon using other stew blade assemblies with different spacing.

#### STEP 8:

Unplug the power cord then holding the cutting group's support handle, begin to assemble completed cutting group into PRO-9 Tenderizer. Open hopper cover, then assemble cutting group by inserting coupling ends first and then rotating the right hand cradle end back counter-clockwise onto the cutting group supports. Make sure coupling ends are locked into the driving shafts and then pull down plastic handle to firmly secure the cutting group. Close hopper cover and begin operation.

#### IV. MAINTENANCE

#### **SHARP ROTATING BLADES**

#### TO AVOID SERIOUS PERSONAL INJURY

- ALWAYS Turn Off and Unplug Machine from Power Source and Perform Lockout/Tagout Procedures Before Servicing.
- **NEVER** Touch This Machine Without Training and Authorization By Your Supervisor.
- ALWAYS Keep Hands Clear of Blades and Moving Parts.
- DO NOT Tamper With, Bypass, or Remove the Safety Cover, Interlock Switch, or Toggle Switch.
- ALWAYS Wear Wire Mesh Safety Gloves When Touching or Handling Stew Cutter or Stripper Attachments for Removal and Cleaning Purposes Only.
- PROMPTLY REPLACE Any Worn or Illegible Warning Labels.
- USE ONLY BIRO Parts and Accessories Properly Installed.

#### A. GENERAL

- 1. Machine should be generally inspected every time it is cleaned (at least daily) to ensure that it is in good operating condition and has not been damaged or tampered with.
  - a. **Safety Cover:** The Safety Cover should be checked for cracks, gouges, or other damage. Replace if any of these conditions exist.
  - b. **Switches and Safety Interlock:** All switches should be checked for proper operation. Check the rubber cap nut on the toggle switch (Part #T3101-2) and the rubber cap nut on the interlock switch (Part #T3105) for wear, tears, or damage. Replace if worn, torn, or damaged.

The Safety Cover interlock switch should be checked as follows:

- i. Make sure ON/OFF toggle switch is in "OFF" position.
- ii. Lower Safety Cover into operating position.
- iii. Plug electrical cord into specified outlet.
- iv. With Safety Cover lowered into operating position, turn ON/OFF toggle switch to "ON" position.

#### KEEP HANDS CLEAR OF SHARP ROTATING BLADES.

- v. Raise Safety Cover to check safety interlock switch machine should turn off.
- vi. Turn toggle switch to "OFF" position. Unplug machine from power source and perform lockout/tagout procedures.

# DO NOT USE THIS MACHINE IF ANY SWITCH FAILS TO FUNCTION PROPERLY.

# TURN OFF AND UNPLUG MACHINE FROM POWER SOURCE AND PERFORM LOCKOUT/TAGOUT PROCEDURES BEFORE PERFORMING ANY OTHER MAINTENANCE.

- c. Cradle and Blade Assemblies: The blades and teeth of the Blade Assemblies should be checked for any damage, including broken, bent, or missing teeth, or gouged or bent blades. Any damaged Blade Assemblies should be replaced.
- d. **Machine Case:** The machine case should be checked for damage beyond ordinary wear and tear. The electrical cord should be checked for gouges, fraying, or other damage. Damaged cords should be replaced.
- e. Labels: The labels on the machine should be replaced if they are worn, torn, or illegible.

#### **B. LUBRICATION**

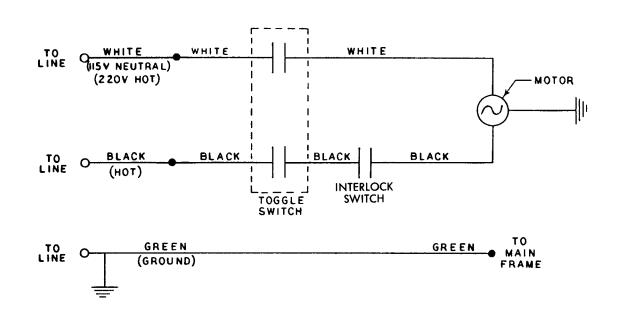

- 1. The **Gear Box** oil **must** be changed after the first four months of operation and, thereafter, at one-year intervals.
- 2. The Motor has sealed bearings.
- 3. To change the **Gear Box** oil and to lubricate the **Motor**, follow these steps:
  - a. Remove the top of the case by removing the seven screws, which hold it in place.

#### b. Gear Box

- i. Remove vent plug and turn machine upside down to drain oil.
- ii. For standard duty unit, use 1.5 oz. of #30 wt. oil. For heavy duty unit, use 2 oz. of #30 wt. oil.
- iii. Dispose of old oil in accordance with local, state, and federal law.
- iv. Replace vent plug.

# WARNING READ AND UNDERSTAND THIS ENTIRE MANUAL BEFORE SIGNING BELOW

MY SIGNATURE ATTESTS THAT I HAVE COMPLETELY READ AND UNDERSTAND THIS MANUAL. I REALIZE THAT THIS MACHINE, IF OPERATED CARELESSLY, CAN CAUSE SERIOUS INJURY TO MYSELF AND OTHERS.

NAME (PRINT)	SIGNATURE	SUPERVISOR'S INITIALS	DATE

#### LIMITED WARRANTY:

**WARRANTY:** The Biro Manufacturing Company warrants that the Model Pro-9 will be free from defects in material and workmanship under normal use and with recommended service. BIRO will replace defective parts, which are covered by this limited warranty, provided that the defective parts are authorized for return, shipping charges prepaid, to a designated factory for inspection and/or testing.

**DURATION OF WARRANTY:** The warranty period for all parts covered by this limited warranty is one year from date of purchase, or eighteen months from factory ship date, whichever date occurs first, except as noted below.

PARTS NOT COVERED BY WARRANTY: The following wearable parts are **not** covered by this limited warranty: tenderizer blades, 3" stew blades, scoring blades, star blades, feeder blades, cutlet blades, and **all** front and rear wire combs. This limited warranty does not apply to machines sold as used, rebuilt, modified, or altered from the original construction in which the machine was hipped from the factory. (Water contaminated electrical systems are not covered under this limited warranty). BIRO is not responsible for service charges or labor required to replace any part covered by this limited warranty or for any damages resulting from misuse, abuse, lack of proper or recommended service, or for electrical connection of equipment, adjustments to switch gear or any other electrical requirements, which must be performed only by a certified electrician.

**EXCLUSION OF WARRANTIES AND LIMITATION OF REMEDIES:** BIRO gives no warranties other than those expressly stated in this limited warranty. THE IMPLIED WARRANTY OF MERCHANTABILITY, THE IMPLIED WARRANTY OF FITNESS FOR PROCESSING OF FOOD PRODUCTS, AND ALL OTHER IMPLIED WARRANTIES ARE SPECIFICALLY EXCLUDED. BIRO IS NOT LIABLE FOR CONSEQUENTIAL OR INCIDENTAL DAMAGES, EXPENSES, OR LOSSES. THE REMEDIES PROVIDED IN THIS BIRO LIMITED WARRANTY ARE PURCHASER'S SOLE AND EXCLUSIVE REMEDIES AGAINST BIRO.

**REGISTRATION CARDS:** You must sign, date and complete warranty registration card supplied with each machine. The warranty card must be returned to The Biro Manufacturing Company for proper registration. If no warranty card is returned to BIRO, the warranty period will begin from the date the machine was originally shipped from the factory.

#### **HOW TO GET SERVICE:**

- 1. Contact the entity from whom you purchased the machine; or
- 2. Consult the yellow pages of the phone directory for the nearest authorized dealer; or
- 3. Contact BIRO Mfg. Company for the authorized service entity (250 plus worldwide) in your area.
